Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_magiclab_senior2dcompositor

Hi,

I have over 9 years of experience in CGI and visual effects production, lighting and compositing over 300 production shots across cinematic attractions, short films, and immersive experiences.

I have extensive production experience with Nuke, handling everything from building complex scripts from scratch to multi-pass CG integration, deep compositing, 2D tracking, matte extraction, and final color grading. Seamlessly integrating 2D elements, 3D CGI passes, and live-action plates to high-end film standards is at the core of my daily work. I take pride in delivering photorealistic shots with a sharp eye for color balance, light interaction, and fine detail.

Having worked at lead and supervisor levels, I keep my node graphs clean, well-structured, and efficient. I communicate proactively with supervisors to evaluate both creative and technical approaches to assigned shots, taking full ownership of my workload, managing tight deadlines, and implementing notes swiftly and accurately. Additionally, having authored master Nuke templates and worked closely with pipeline developers, I feel right at home within structured studio pipelines.

I am based in Krakow, Poland. I am currently available and would love to discuss how my compositing skills and experience can contribute to your upcoming projects at Magiclab.

Cheers,

Oleh
