Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_unocardia_it_support

Hi,

I have a strong background in both IT support and web development, and I enjoy combining the two to keep systems running smoothly and improve digital presence.

I have deep experience in IT support and systems management for creative studios. I'm used to handling comprehensive technical support, from configuring workstations (Windows and Linux) and managing secure network storage, to setting up automated backups and finding solutions that speed up daily work. I'm very proactive when it comes to identifying technical bottlenecks and implementing improvements in the IT environment.

On the web and graphics side, I'm very comfortable managing content and designing web elements. I built my own high-performance portfolio from scratch, and I've also developed custom tools for automating social media publishing. Working with WordPress to update doctor profiles, create new subpages, and implement optimized graphics is something I can handle easily. With my background in digital art, I also have a solid aesthetic sense for preparing and editing graphics.

I'm currently based in Krakow and am open to a B2B or mandate contract. I am available now and would love to discuss how I can help support your team and improve the clinic's IT workflow.

Cheers,

Oleh
