Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_crunchingkoalas_3dgeneralist

Hi,

I have over 9 years of experience in 3D production, real-time engines, and procedural workflows, working across stylized family-friendly projects and high-fidelity CGI.

In my recent work, I integrated Unreal Engine 5 into our production pipeline, building stylized scenes and assets from the ground up. I regularly handle everything from setting up prefabs, master materials, and custom shaders to crafting mood-driven lighting and Niagara VFX. I am very comfortable working with store assets from Unreal Marketplace and the Asset Store, integrating them cleanly with custom low-poly and high-poly models, UVs, and Substance texturing.

Over the years, I have worked across diverse visual styles, ranging from kids animation series like Dave and Ava to stylized cinematic attractions like The Magical Slide (<https://sydoryk.com/detail/SunnyBunny>). My primary toolkit includes Houdini, Maya, Unreal Engine, Nuke, Photoshop, and Substance 3D.

I work independently and communicate clearly, making sure the artistic vision matches the script and runs smoothly on target platforms. I am also mindful of digital accessibility principles so games remain clear and approachable.

I'm based in Krakow, Poland, and available to start for the project duration. I would love to connect and discuss how my 3D generalist skills can support your game projects.

Cheers,
Oleh
