

OLEH SYDORYK

Krakow, Poland

Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_bnp_jrfrontend

Hi,

You can view my full resume here: [Resume \(PDF\)](#)

I have a strong foundation in web development, building custom web applications using modern JavaScript, TypeScript, Node.js, and APIs. Recently, I developed a custom web application for automated content publishing and scheduling from the ground up, writing the code you can review on my [GitHub](#).

Beyond front-end development, I have deep experience in IT and DevSecOps. I've architected and managed multi-node on-premise servers, handled system administration (Linux/Windows), and built fully automated Docker and GitOps workflows. Since your team uses Git, Docker, and Linux extensively, I'm very comfortable navigating the infrastructure that supports the front-end applications.

While I might not have direct production experience with Angular, Java 21, and Spring, I learn quickly and hope you can see my solid foundation in JavaScript/TypeScript and my deep systems administration background as a strong bridge to this role. I can easily pick up new frameworks as needed.

I'm currently based in Krakow. I am currently available and interested to discuss the position in more detail.

Cheers,

Oleh
