

OLEH SYDORYK

Krakow, Poland

Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_eyzee_jr_it_pm

Hi,

You can view my full resume here: [Resume \(PDF\)](#)

While my background is rooted in managing highly dynamic 3D production pipelines and IT infrastructure rather than a traditional Software House, I have extensive experience coordinating tasks, organizing workflows, and dealing with frequent priority shifts. For over 9 years, I've managed complex project schedules, tracked information flow, and ensured perfect order in technical documentation.

I have a strong technical foundation in web development and DevOps. I recently built a custom web application for automated content scheduling ([MultiCast](#)), and I developed my own high-performance portfolio site using Astro and TypeScript. I also maintain my own high-availability home server using Docker and GitOps, which gives me practical knowledge of test/production environments, version control, and CI/CD pipelines.

I am very comfortable working with tools like Jira and Confluence for task tracking and status monitoring, ensuring that every project detail is clearly communicated to business owners and technical teams alike. I'm eager to learn more about IT project management from an experienced leader and bring my organizational skills to Eyzee.

I'm currently based in Krakow, Poland. I am available and would love to discuss the position in more detail to see how I can best support your delivery team.

Cheers,

Oleh
