

OLEH SYDORYK

Krakow, Poland

Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_linkgroup_python

Hi,

You can view my full resume here: [Resume \(PDF\)](#)

I have a strong background in systems engineering, DevSecOps, and scripting, where I have actively managed technical infrastructure and automated complex workflows. I specialize in bridging traditional IT with modern development practices, heavily utilizing Python and Bash to orchestrate daily operations. You can view examples of my technical pipelines and automation scripts on my [GitHub](#).

My technical foundation aligns strongly with your needs for navigating Linux environments and engineering custom Python pipelines. I have hands-on experience working with API integrations, data validation, and automation. I'm also very comfortable working with Docker containerization, GitOps workflows, and continuous integration concepts, having architected and managed multi-node on-premise infrastructure.

While my background is diverse, I have a solid foundation in scripting and system administration that directly translates to your tech stack. I am highly motivated to deepen my expertise in CI/CD tools like Jenkins and Kubernetes, and I am eager to apply my problem-solving skills to investigate incidents and design robust technical solutions for your finance portal project.

I am based in Krakow and would be happy to work remotely or in the hybrid model. I would love to continue this conversation to figure out how I can best contribute to your Agile teams and help build secure financial tools.

Cheers,

Oleh
