Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

Beyond art, I have deep experience in IT and systems administration for creative studios. I've architected and managed multi-node on-premise render farms, managed workstation lifecycles, and engineered custom Python pipelines for cross-network file validation and automation. My background requires extreme accuracy and attention to detail when dealing with file structures and final deliveries.

Recently, I've been heavily involved in product and packaging visualization. This involves preparing proofs for packaging and printing, where I meticulously ensure there is extra space for bleeds, safe zones, and proper die-cut lines. I learn quickly and hope you can see my strong technical foundation and deep attention to detail as a bridge to this role. I can easily pick up SAP and specific graphic platforms for checking D2P agency files.

I'm currently based in Krakow, Poland. I would love to continue this conversation so we can figure out which of my skills you need the most and how I can best contribute to your team.

Cheers,

Oleh
