

OLEH SYDORYK

Krakow, Poland

Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_statestreet_webscraper

Hi,

You can view my full resume here: [Resume \(PDF\)](#)

I am an adaptable IT and Systems Engineer with a strong foundation in Python automation and web technologies. I noticed you are looking for a Junior Web Scraper at State Street to gather international macroeconomic indicators, and I believe my background in workflow automation and data handling makes me a great fit for this role.

In my recent projects, I have engineered custom Python pipelines for cross-network file validation, directory synchronization, and automated data processing. I have extensive experience working with web technologies (HTML, CSS, JavaScript) from developing my own high-performance portfolio website. Additionally, I recently built a custom automated content application called MultiCast ([GitHub](#)) that interacts with external APIs and processes structured data formats like JSON.

While I haven't held a title specifically as a "Web Scraper", I am very comfortable working with DOM structures, XPATH, and SQL databases. My extensive experience in diagnosing and troubleshooting systems issues has given me a methodical approach to problem-solving, which I would love to apply to monitoring and maintaining your web scraping processes. I learn quickly and am eager to adapt my Python and web skills to your specific data gathering methodologies.

I am currently based in Krakow and am available for a hybrid work environment. I would love to continue this conversation to discuss how my technical skills can contribute to the high-quality data delivery at State Street.

Cheers,

Oleh
