

OLEH SYDORYK

Krakow, Poland

Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_tools_specialist

Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

Beyond art, I have deep experience in IT and DevSecOps for creative studios. I've architected and managed multi-node on-premise render farms, managed workstation lifecycles (Linux/Windows), and engineered custom Python pipelines for cross-network file validation and automation. This background has given me strong problem-solving skills and extensive experience in analyzing and resolving hardware and tool-related bottlenecks across diverse systems.

While I might not have direct experience with ArcGIS, I learn quickly and hope you can see my procedural mindset and technical problem-solving background as a strong bridge to this role. I write custom tools and automation scripts for my freelance projects all the time, handling complex data in Houdini and Python and translating it into usable output. This aligns perfectly with managing data pipelines and tool fixes for your operations team. I also rely heavily on version control through GitHub for my CI/CD pipelines and web apps. You can check out some of my custom tools on my GitHub:

- [MultiCast](#): A fully automated procedural pipeline and web app for social publishing.
- [sydoryk.com](#): My portfolio website featuring custom Astro.js architecture.

I'm currently based in Krakow, Poland, and I am available to work on weekends as needed. I would love to continue this conversation so we can figure out which of my skills you need the most and how I can best contribute to your team.

Cheers,

Oleh
