Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_keywords_lighting

Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

At my previous position, I led the transition of our traditional rendering pipeline to Unreal Engine 5. We produced multiple attractions and movies entirely in Unreal. I was responsible for the lighting workflow, building procedural environments using PCG, and creating complex stylized FX with Niagara. Here is an example of an Unreal project where I handled both the FX and cinematic lighting: <https://sydoryk.com/detail/SunnyBunny>.

I have a very sharp eye for lighting and mood, having lit and composited over 300 production shots. I designed studio-wide Redshift and Arnold workflows tailored for Maya, and authored master Nuke templates that standardized our compositing across multiple large-scale cinematic attractions.

I'm currently based in Krakow, Poland, but I am very open to relocating to Tokyo and would require visa sponsorship. I would love to continue this conversation so we can figure out which of my skills you need the most and how I can best contribute to your team.

Cheers,

Oleh
