Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_stim_lookdev

Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

I have a very sharp eye for lighting and mood, having lit, look-deved, and composited over 300 production shots. I designed studio-wide Redshift and Arnold workflows tailored for Maya, and authored master templates that standardized our looks across multiple large-scale cinematic attractions.

I rely heavily on Houdini and Solaris to automate and scale up asset production. I've engineered fully automated pipelines using Houdini TOPs, and I am very comfortable with Python and VEX to create procedural tools or optimize lookdev workflows. Here is a sneak peek at a recent unfinished personal project:

https://youtu.be/3gb4II7_XRA

At my previous position, I led a team of lighting and lookdev artists, providing technical direction, defining the visual baseline, and authoring pipeline documentation to ensure our shading and materials were optimized for rendering.

I'm currently based in Krakow, Poland, but I am open to discussing the on-site location in Tenerife. I would love to continue this conversation so we can figure out which of my skills you need the most and how I can best contribute to your team.

Cheers,
Oleh
