Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

Beyond art, I have deep experience in IT and DevSecOps for creative studios. I've architected and managed multi-node on-premise render farms, managed workstation lifecycles (Linux/Windows), and engineered custom Python pipelines for cross-network file validation and automation. Working with massive, complex datasets has always been central to my role.

I am highly proficient in Python and frequently use it for large-scale data processing and workflow automation. I also rely heavily on AI tools like Claude Code and local LLMs on a daily basis. I use them to write and refine code, automate repetitive analytical tasks, and rapidly prototype custom solutions, which significantly accelerates my productivity.

While I might not have direct experience with ERP systems like Comarch Optima, I learn quickly and hope you can see my strong foundation in Python, data management, and procedural automation as a strong bridge to this role. I can easily pick up advanced SQL queries and your specific data environment as needed.

I'm currently based in Krakow, Poland. I would love to continue this conversation so we can figure out which of my skills you need the most and how I can best contribute to your team.

Cheers,
Oleh
