Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_bones_cg_lead

Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

I rely heavily on Houdini and Solaris to automate and scale up asset production. I've created CGI movie production pipelines in Maya/Redshift and Unreal, engineered fully automated pipelines using Houdini TOPs for massive product visualization batch rendering, and created procedural tools to generate complex FX or scatter vegetation.

Beyond technical art, I have experience in IT and DevSecOps. I've managed multi-node on-premise render farms, managed workstation lifecycles (Linux/Windows), and engineered custom Python pipelines for cross-network file validation and automation. I also use AI in my day-to-day work to automate internal workflows.

While I might not have direct experience with motion capture technology, I learn quickly and hope you can see my procedural mindset and pipeline development experience as a strong bridge to this role. I can easily dive into new workflows as needed.

I'm currently based in Krakow, Poland. I would love to continue this conversation so we can figure out which of my skills you need the most and how I can best contribute to your team.

Cheers,

Oleh
