Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead/supervisor level.

At my previous position, I led the transition of our traditional rendering pipeline to Unreal Engine 5. We produced multiple attractions and movies entirely in Unreal. I was responsible for the lighting workflow, building procedural environments using PCG, and creating complex stylized FX with Niagara. Here is an example of an Unreal project where I handled both the FX and cinematic lighting: <https://sydoryk.com/detail/SunnyBunny>

I rely heavily on Houdini and Solaris to automate and scale up asset production. I've engineered fully automated pipelines using Houdini TOPs for massive product visualization batch rendering, and created procedural tools to generate complex FX or scatter vegetation. Here is a small example of tools created inside Houdini to be used directly in Unreal: <https://sydoryk.com/detail/HoudiniTools>

While I might not have direct commercial experience with Unity or Blender recently, my deep foundation in environment building and extensive work in Unreal Engine and Maya make it easy for me to adapt to new pipelines quickly. I'm also very comfortable with Substance Designer, Git, and creating larger scenes.

I'm currently based in Krakow, Poland, and available to work on-site at least 4 days a week. I would love to continue this conversation so we can figure out how I can best contribute to the House Flipper 2 team.

Cheers,
Oleh
