Hi,

I have over 9 years of experience in full CG movie production, real-time visualization, and procedural workflows, primarily working at a lead and supervisor level.

Recently, I have been focused on high fidelity product visualization and configurators, ranging from interactive microphone configurators to industrial equipment and furniture. I am experienced in transforming raw CAD data into production ready geometry and establishing physically accurate PBR textures, which is a great match for your need for photorealistic 3D renderings of interiors and material innovations.

Since your role also involves video content for social media and brand storytelling, I want to highlight that I have lit and composited over 300 production shots. You can see a summary of my video and animation work in the showreel linked below. I am very comfortable working with Adobe Creative Cloud and advanced 3D tools to develop these assets.

I am currently based in Krakow, Poland, and I am very open to collaborating with the Poznan team. I am currently available and interested to discuss the position in more detail.

Cheers,
Oleh
