Interactive Cover Letter & Portfolio: https://sydoryk.com/coverletter_sydorykoleh_gamesture_uidesigner

Hi,

I have a strong background in interactive design, 3D pipelines, and building automated tools that speed up creative production. I don't believe in manually pushing every single pixel when modern AI pipelines and structured design systems can produce dozens of high-quality UI variants in an hour.

Over the past few years, I have actively integrated AI and rapid prototyping into my daily workflow. I build custom scripts, vibe-code interactive web apps, and connect generative tools into pipelines that turn moodboards and references into functional UI screens, popups, and offer panels. On the technical side, I build scalable component systems and work closely with developers to make sure assets and layouts translate cleanly into engines like Unity.

Here is a practical example of an end-to-end automated procedural workflow I built. It takes a raw .midi file and automatically generates the final .mp4 video with every single step automated:

- Physics simulation (rigid-body dynamics)
- Particle simulation
- Caching and geometry preparation
- Automated batch rendering
- Multi-pass compositing
- Audio synthesis timed directly to MIDI notes
- FFmpeg video encoding and optimization
- Automated upload and scheduling to social platforms using my custom web app, [MultiCast](#)

Beyond visual design, I develop interactive web applications and real-time configurators (using TypeScript, CSS, and modern web frameworks). You can test several interactive UI projects directly in my portfolio:

- Interactive Headphones Configurator: <https://sydoryk.com/detail/Headphones>
- Interactive Microphone Configurator: <https://sydoryk.com/detail/MicConfigurator>
- Automated Content Pipeline (MultiCast): <https://github.com/SydorykOleh/MultiCast>

I speak fluent English, but not Polish(I can understand only), and I am based right here in Krakow. I am currently available and would love to discuss how I can help build Gamesture's AI-first UI production pipeline.

Cheers,
Oleh

I consent to the processing of my personal data by Gamesture sp. z o. o. for the purpose of the recruitment process and future recruitment processes.
