Hi,

I have over 9 years of experience in full CG production, real-time visualization, and procedural workflows, primarily working at a lead and supervisor level.

At my previous studio, I led our transition to Unreal Engine 5, delivering multiple attractions and movies entirely in-engine. I worked extensively with Unreal Landscapes, World Partition, foliage systems, and PCG for procedural asset scattering. I regularly compose and refine natural environments, dressing key locations with vegetation, rocks, dead trees, and water systems while establishing clear visual hierarchy, atmosphere, and mood. I also have solid experience adapting ready-made Marketplace and Fab assets, tweaking master materials, and optimizing scene performance to ensure smooth frame rates.

While my recent background spans cinematic attractions and procedural pipelines, I have a genuine passion for natural environments, outdoor settings, and hunting grounds. I am very comfortable collaborating closely with level and mission designers to turn raw procedural terrain into readable, atmospheric points of interest and mission locations.

I'm currently based in Krakow, Poland, available, and interested to discuss how I can best support your team on this project.

Cheers,
Oleh
